Starting your own business is *scary*. *Really scary*.

How do you know if your idea is any *good*? Or if your customers will *ever* show up?

How do you know... what you're doing **AT ALL**?

There's no place, degree, or university that can teach you how to become a successful Entrepreneur.

You just have to get out there and learn everything for yourself. *One step at a time....*

Right?

Wrong.

Entrepreneurship is not a mythical, illusive creature and it's not a secret that's hidden behind doors.

You **CAN** learn how to become a successful Entrepreneur and you **CAN** learn how to prepare yourself.

In this course, we're going to do just that.

You're going to learn everything you need to know about being an Entrepreneur, like:

- *The core concepts*
- *How to think like an Entrepreneur*
- *What you should care about and conversely ignore*
- *How to go about gathering the resources you need to tackle your dream*

And when you're completely ready to go toe to toe with any "*veteran*" business owner out there, you're going to learn something they wish they knew:

How to consistently come up with insightful, actionable business ideas

It's everything you need to get started.

You'll go from 0 to Entrepreneur in no time.

About the instructor:

Top rated Udemy Instructor with over **650+ 5 star reviews**.

Teaches *9 different courses* on Entrepreneurship, *with over 20,000 students enrolled*.
